

# STONCHEM

691

Stonchem 691 is a conductive, spark-proof novolac epoxy coating utilizing carbon nanotube (CNT) technology. In addition to conductivity, it provides excellent resistance to concentrated sulfuric acid, solvents, and caustics.

Colour reproductions are as accurate as modern photography and quality printing methods can produce. For actual colour, please request a sample at [www.stonhard.com](http://www.stonhard.com).
