

Stonglaze is a family of high performance wall systems formulated for application over concrete, block or drywall. Each system features a smooth, seamless, stain resistant surface. Ideal for environments where sanitary conditions are a requirement.

Stonglaze® VSR

A high performance, high solids epoxy wall glaze coating that is applied to vertical surfaces with a smooth, tile-like finish.

Stonglaze® VSE

A multi-layer, liquid-applied, flexible urethane wall system for sterile environments. Can stand up to rigorous conditions.

Stonglaze® VSF

A decorative, high gloss wall system for use in commercial and industrial applications that breaks away from the traditional painted look. Also available for fast track installations.

Stonglaze® VSI

A high performance, epoxy wall coating reinforced with a micro-fiberglass additive for extra protection against cracking and chipping.

Stonglaze® VSD

A fiberglass reinforced epoxy wall system utilizing a woven fiberglass mat.

Stonglaze® VSM

A three component epoxy wall surfacing material used in areas subject to serious abrasion and corrosion. Used primarily to protect walls in industrial areas exposed to chemical spills and continuous impact.

Color matching available with additional lead time, minimum order requirements and a slight premium.

Color reproductions are only as accurate as modern photography and quality printing methods can produce. For actual color, see flooring sample.
