

The Stongard line of products improve safety and provide positive side waterproofing moisture protection. Systems are high performing, slip, abrasion and crack resistant for parking garages, ramps, helpads and mechanical equipment rooms.

Stongard™ TM

A durable, traffic bearing membrane designed for heavy pedestrian or vehicular traffic areas in parking structures, ramps, stadium concourses, helpads and pedestrian bridges. Stongard™ stands up to harsh road salts and petroleum-based products found in parking garages and ramps.

Stongard™ MR

An elastomer-based flooring system created for positive side waterproofing applications. It is designed to protect areas below mechanical rooms, pump and mezzanine floors, from water damage.

Stongard™ MD

An elastomer-based decorative quartz, slip resistant, positive side waterproofing system created for mechanical rooms, pump mezzanines or any indoor space requiring moisture protection, with a focus on design.

Stongard™ MX

An elastomer-based decorative quartz, slip resistant, positive side waterproofing system reinforced with fiberglass where additional performance is needed. Designed for mechanical rooms, pump mezzanines or any indoor space requiring waterproofing.

Color matching available with additional lead time, minimum order requirements and a slight premium. Color reproductions are as accurate as modern photography and quality printing methods can produce. For actual color please request a sample, www.stonhard.com
